

# **Project MACULA Case Report**

0096032L

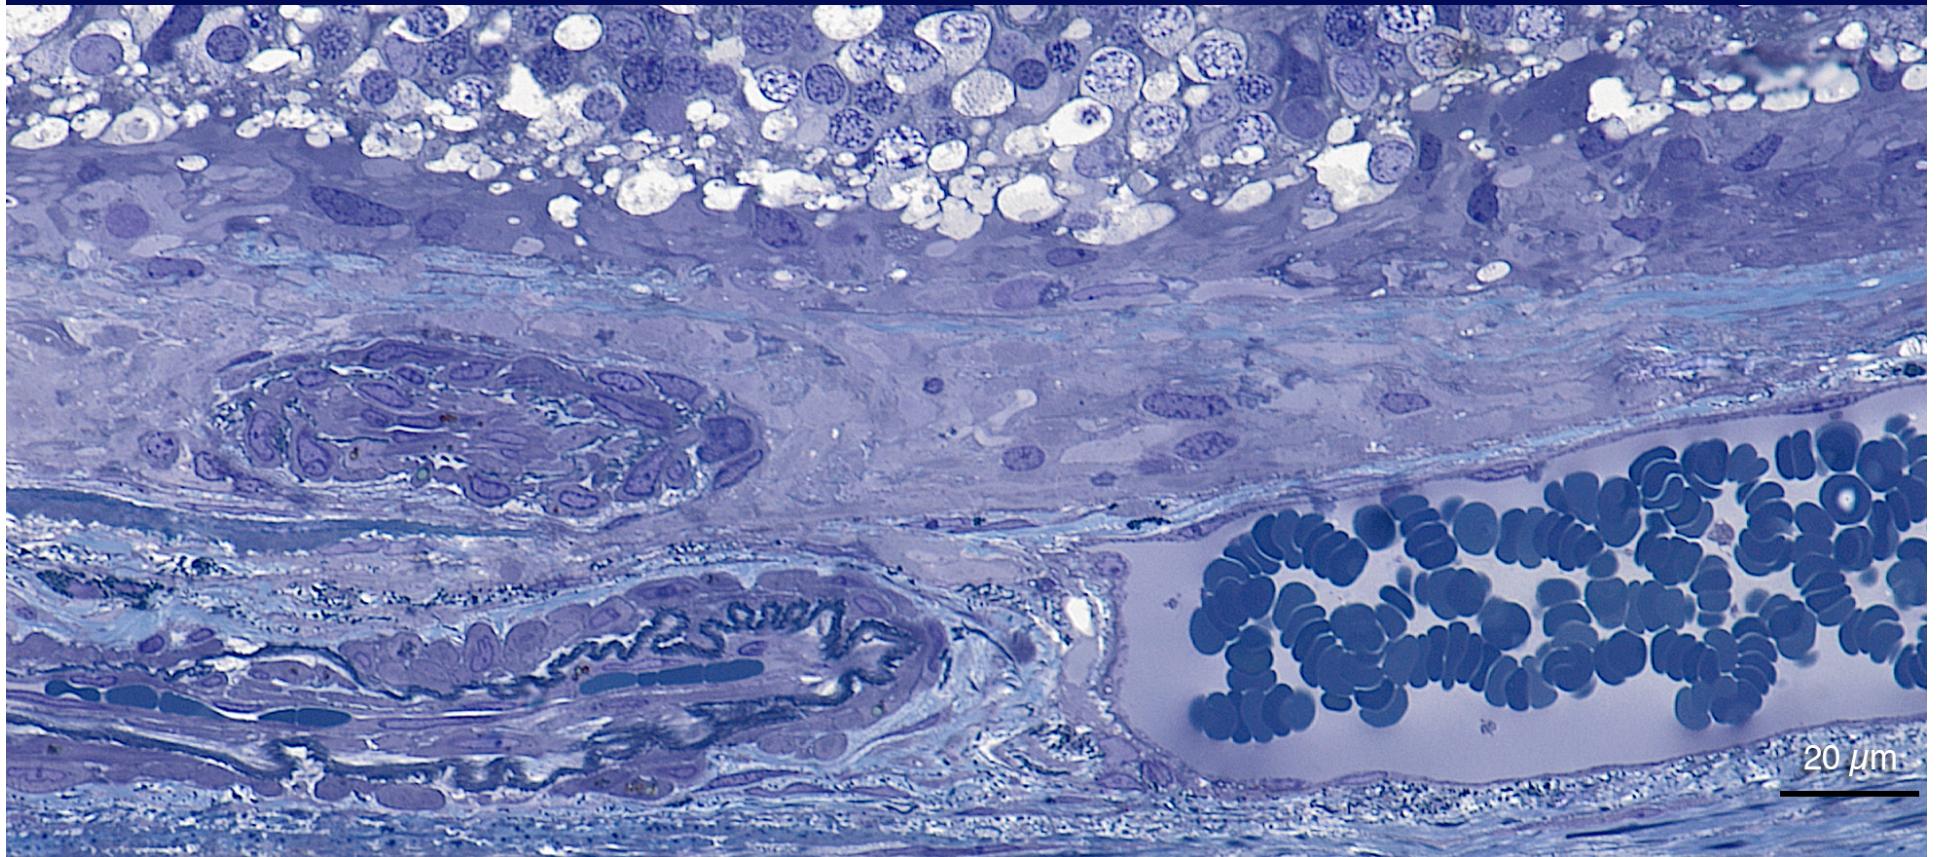

86 yr old Caucasian female  
Neovascular AMD

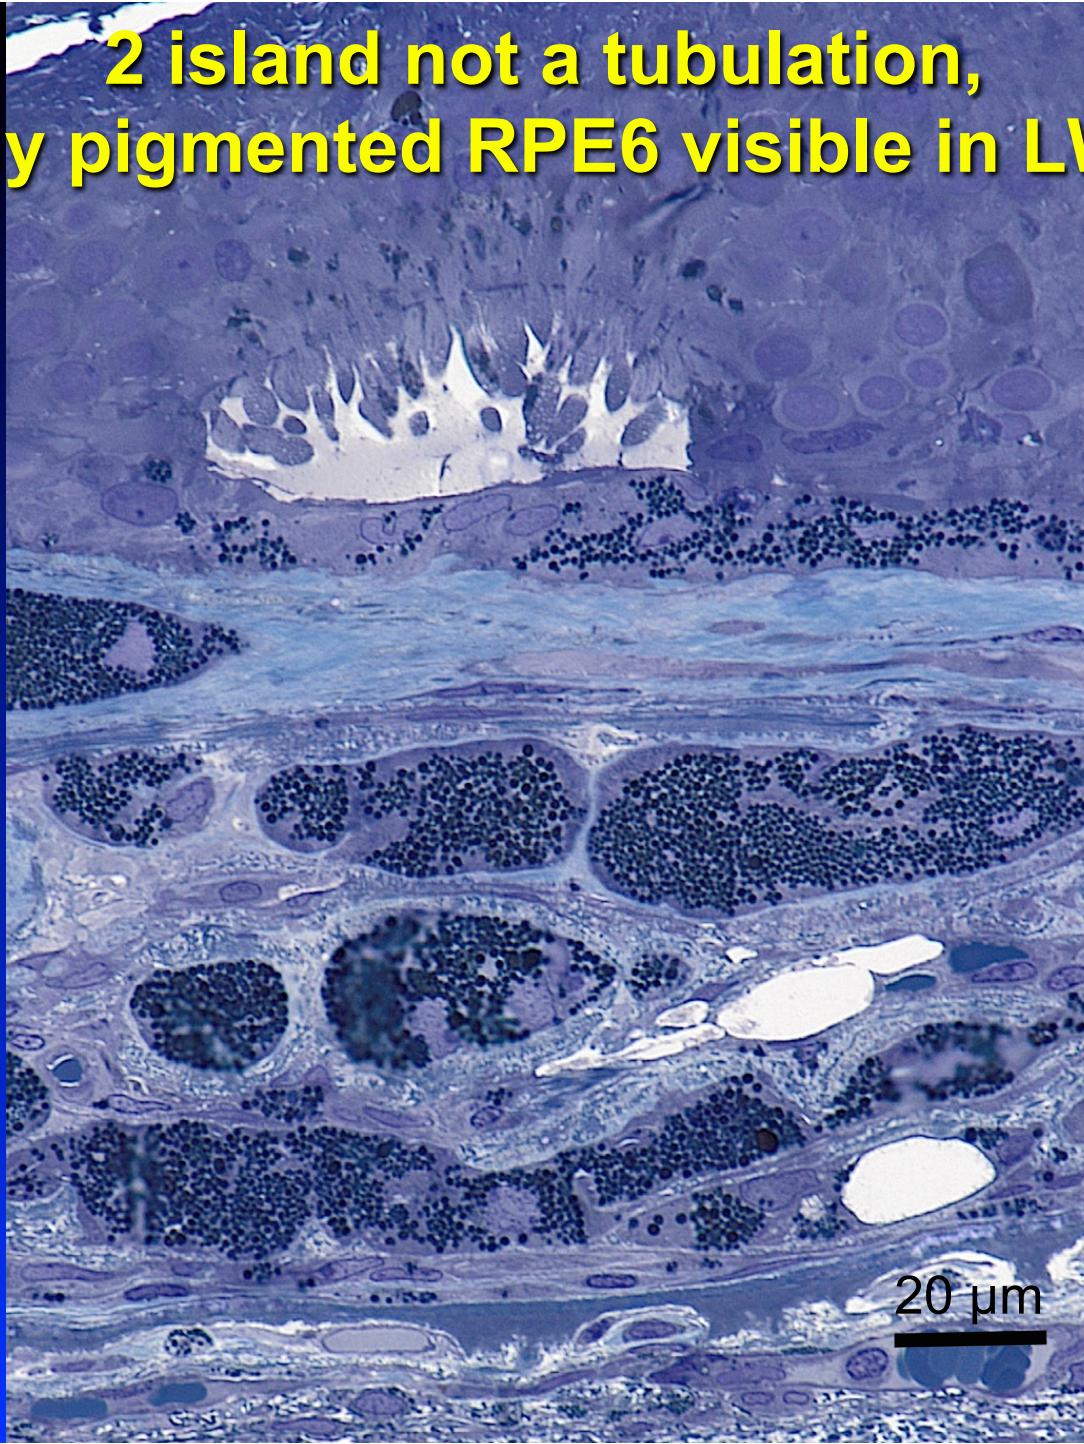

# Foveal sections

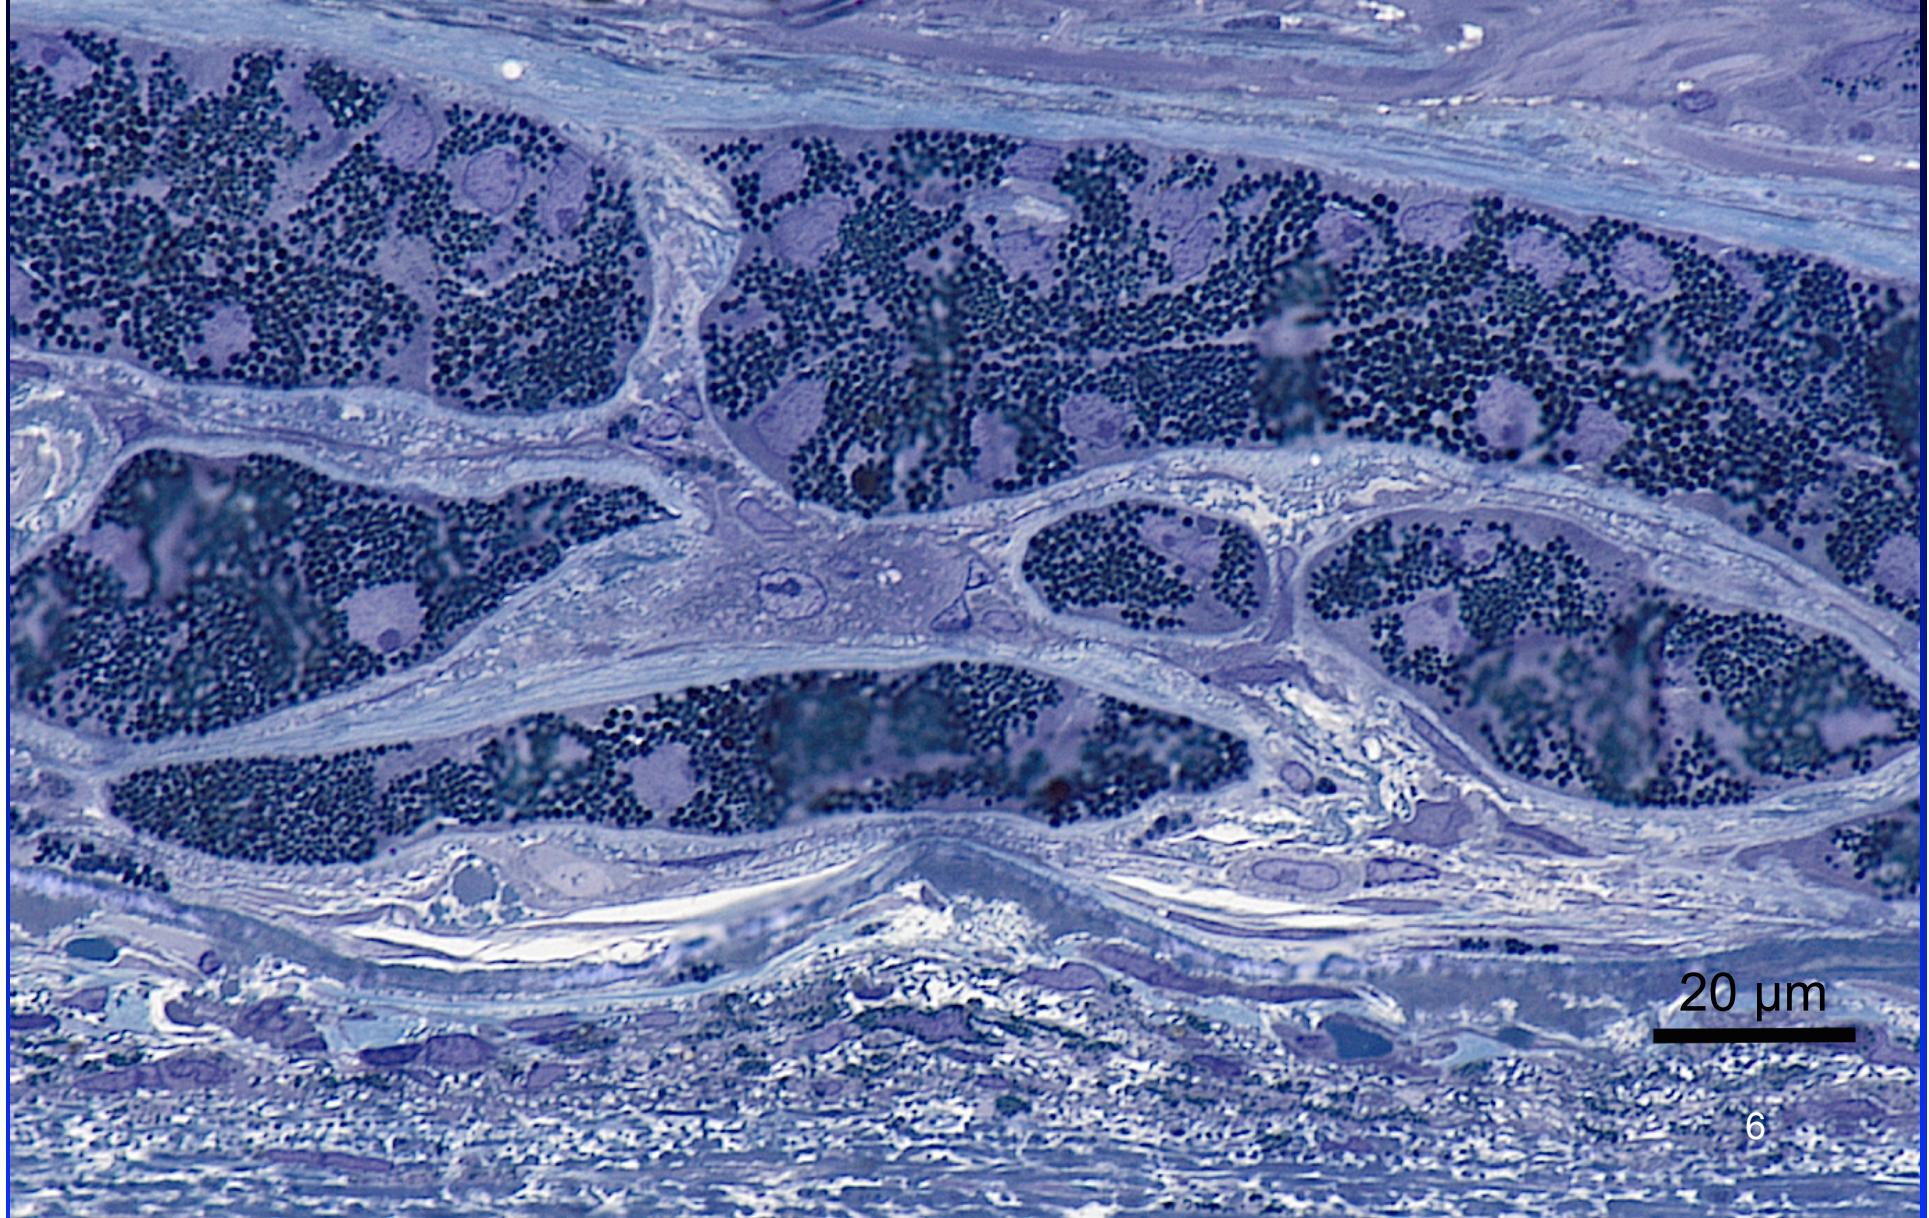

# 1 Vessel types at BrM gap

**2 island not a tubulation,  
highly pigmented RPE6 visible in LW-AF**

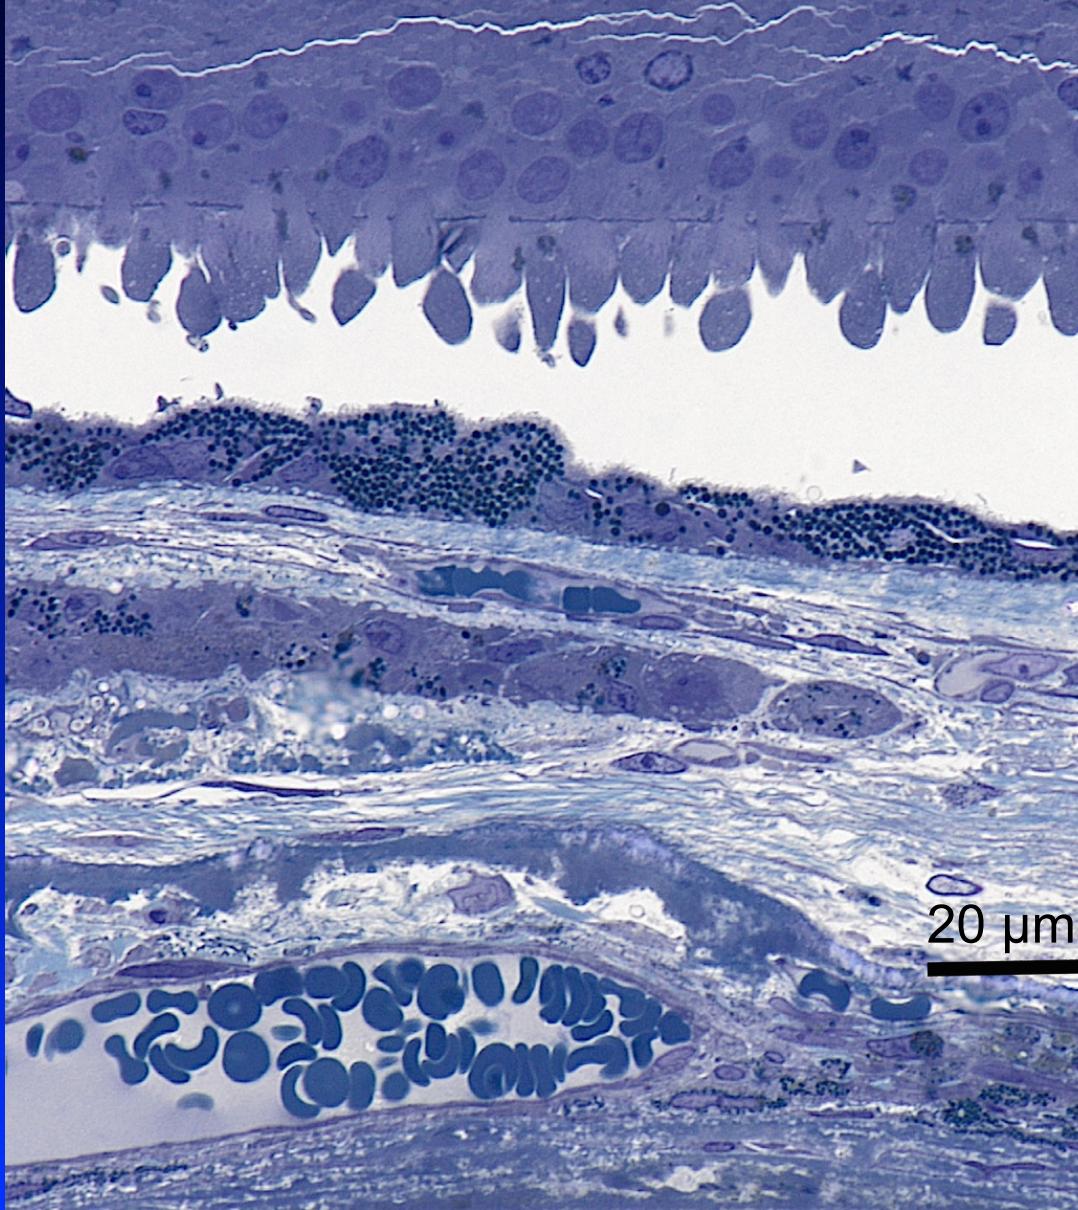

3 contraction fold in BrM; cells with large spherical melanosomes

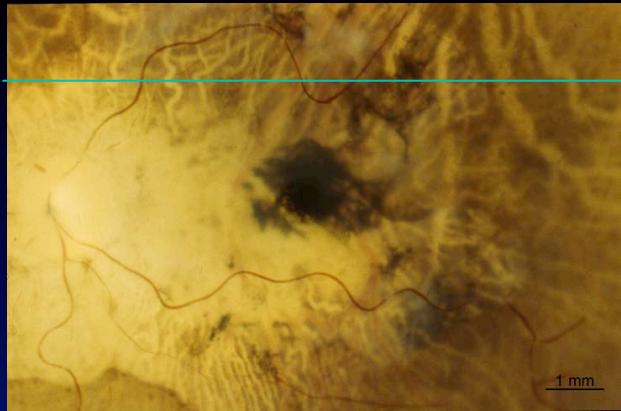

**4 different body sizes and melanosome content – RPE?**

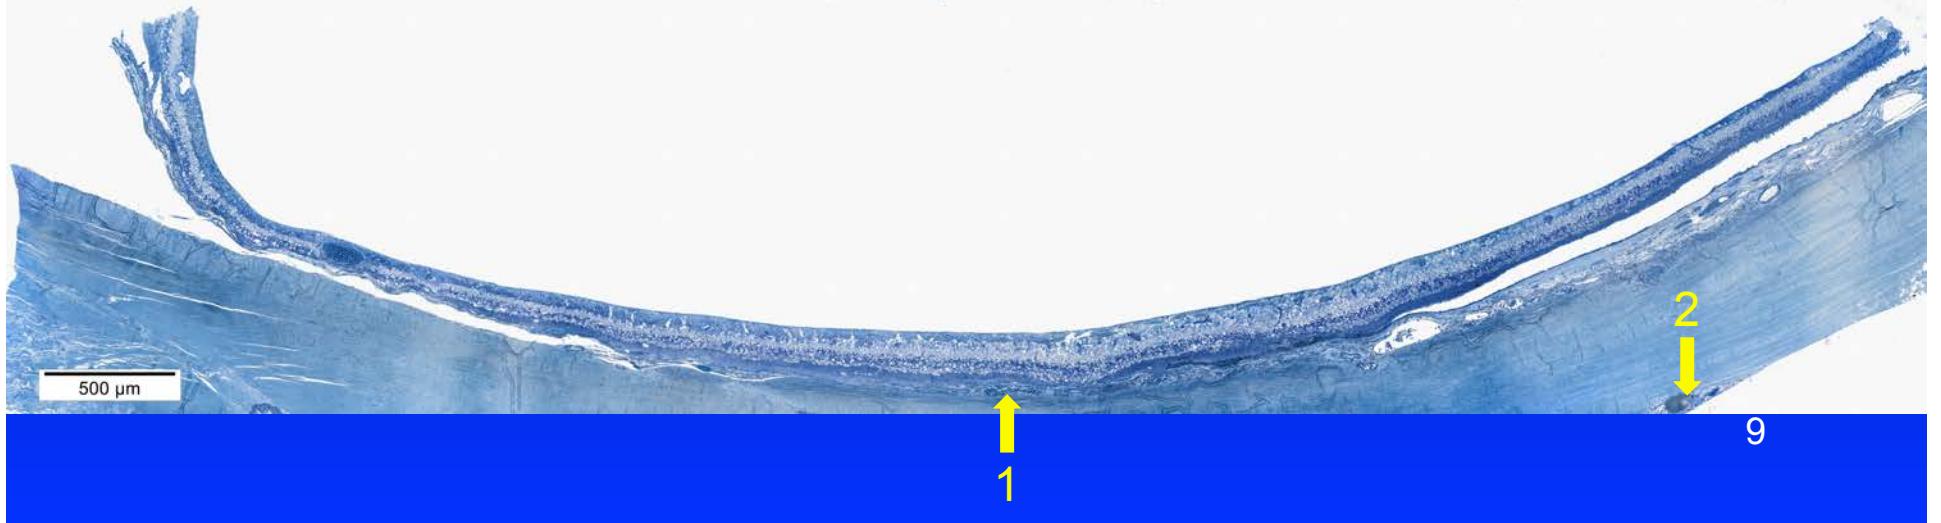

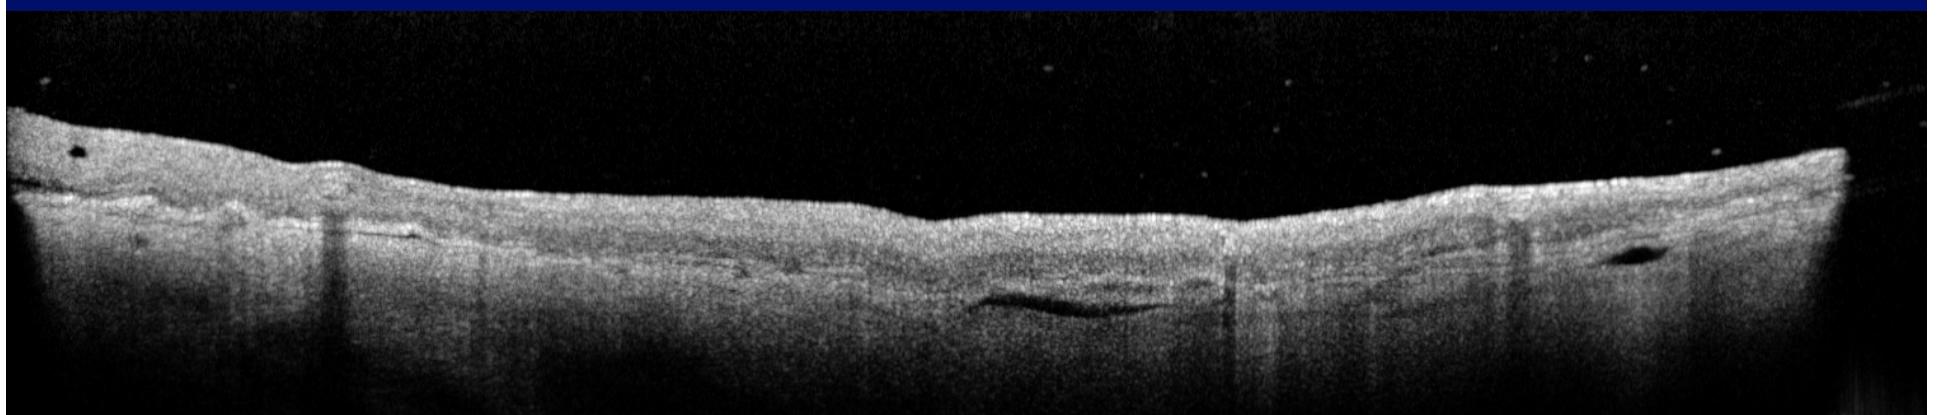

**5 cone row visible on OCT; RPE layers,  
intervening fibrovascular scar**

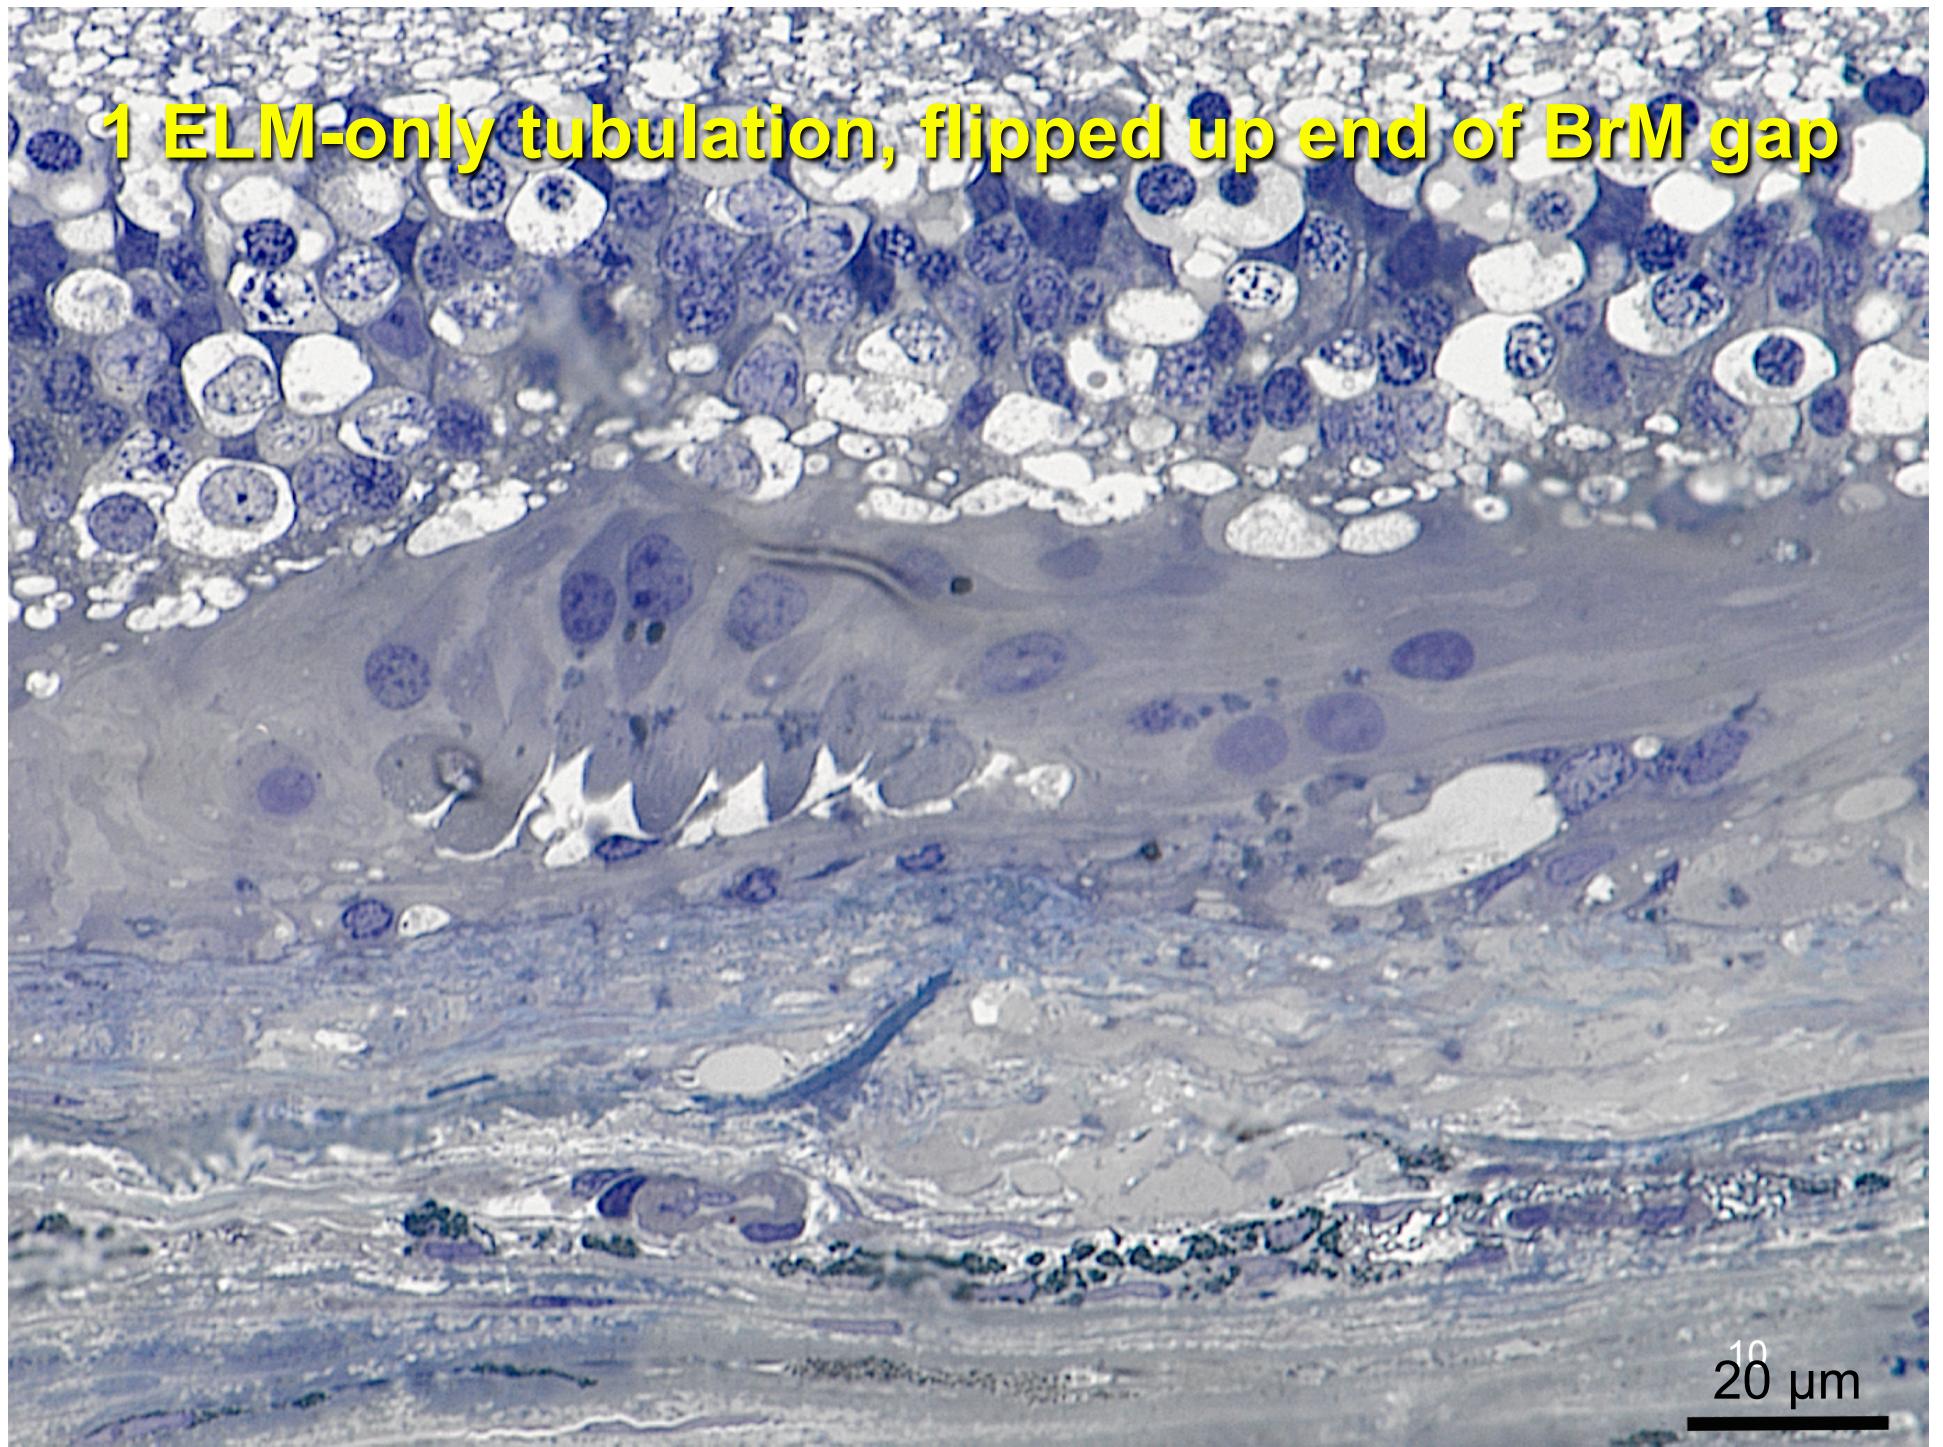

# Perifoveal sections

1 ELM-only tubulation, flipped up end of BrM gap

**2 lipid globules external to sclera**
